CHITWAN PLYWOOD

Company & Product Profile — Certified Plywood Manufacturer, Bareilly, Uttar Pradesh

About Chitwan Plywood

Chitwan Plywood has been manufacturing certified plywood, block boards, and flush doors from Bareilly, Uttar Pradesh since 2008. Founded by Raghav & Samarth Agarwal, the company has grown from a single manufacturing unit into a trusted supply partner for dealers, distributors, furniture manufacturers, interior contractors, and builders across India.

The company's focus has remained consistent since inception: certified, batch-tested plywood manufactured to a documented quality standard, rather than variable-quality stock resold under a brand name.

Product Range & Specifications

Chitwan Plywood manufactures a complete range of plywood to serve multiple applications and budgets:

Thickness Options	Product Series	Grade	Face Veneer
6mm, 9mm, 12mm, 15mm, 16mm, 18mm (13-ply), 18mm (15-ply)	Chitwan Gold Series Chitwan Club Series	BWP (Boiling Water Proof)	Gurjan Okoume

All products are available in BWP (Boiling Water Proof) grade, suitable for kitchens, bathrooms, and other high-moisture environments. Face veneer options include Gurjan and Okoume for consistent grain, colour, and finish across large orders.

Core Product Categories

- Block Board — for furniture carcasses, shelving, and structural interior use
- Plywood — Gold Series and Club Series, across all standard thicknesses
- Flush Doors — manufactured to standard sizing for residential and commercial use

Who We Serve

- Plywood dealers and distributors seeking a certified, single-source manufacturer
- Furniture manufacturers requiring consistent grain, colour, and finish at scale
- Interior contractors who need dependable board strength for cabinetry and paneling
- Builders and developers sourcing bulk supply without compromising on grade

Why Dealers & Contractors Choose Chitwan

Inconsistent plywood quality is one of the most common reasons dealers lose customer trust — fluctuating batch quality, mismatched colour and finish, and boards used in the wrong application all lead to costly failures downstream. Chitwan Plywood's manufacturing process is built around consistency: certified BWP grade, controlled veneer sourcing, and a documented production standard that dealers can stand behind without hesitation.

Chitwan Sarthi — Dealer & Distributor Program

Chitwan Sarthi is Chitwan Plywood's dedicated program for distributors and dealers, offering steady supply, consistent product quality, and dedicated support to help partners grow their plywood wholesale business.
